DATA SCIENTIST | DATA ANALYST

DATA ANALYSIS & STATISTICAL MODELING | DATA VISUALIZATION | PREDICTIVE ANALYTICS

COMMITTED TO LEVERAGING ADVANCED ANALYTICS TO OPTIMIZE PERFORMANCE AND DRIVE SUSTAINABLE GROWTH.

Skilled Data Analyst with a strong foundation in data science and statistical analysis. Proficient in developing and maintaining machine learning models to extract insights from complex data, enhancing decision-making and operational efficiency. Adept at leveraging tools such as Python, R, SQL, Azure, Power BI, and Snowflake to analyze datasets, generate actionable insights, and support data-driven strategies. Proven ability to optimize operational performance, drive sustainability initiatives, and improve customer experiences through data analysis and predictive modeling.

SELECTED ACHIEVEMENTS:

- ✓ **Streamlined Data Processing Using Cloud Technologies:** Leveraged cloud-based platforms such as Azure, Databricks, and Snowflake to streamline data processing, resulting in faster decision-making and more efficient course delivery.
- ✓ **Developed Predictive Models to Drive Training Solutions:** Analyzed customer behavior data and created predictive models that identified trends in learning preferences and training outcomes. Insights enabled the development of targeted IT training programs, improving student engagement and optimizing course offerings for better results.
- ✓ **Created Actionable Insights Through Advanced Data Visualization:** Designed and implemented interactive dashboards and visual reports using tools like Power BI and Tableau to track key performance metrics. Data-driven visualizations empowered stakeholders with real-time insights, enabling informed decision-making.

TOOLS & TECHNOLOGIES

- Google BigQuery
- Statistical Data Analysis
- Machine Learning
- Hadoop
- MongoDB
- GIT
- Databrick
- Snowflake
- Azure
- Power BI
- Tableau
- Cloud Computing
- Python Programming
- R Programming
- Machine Learning
- Artificial Intelligence
- Advanced Microsoft Excel
- Postgre SQL

WORK EXPERIENCE

DATA ANALYST (REMOTE), EEL RIDES, LONDON, UNITED KINGDOM. SEPTEMBER. 2024 – PRESENT

Leveraged data analysis to optimize fleet performance, enhance operational efficiency, and support Eel Rides' sustainability goals. Delivered actionable insights on customer behavior, pricing strategies, and market trends to drive eco-friendly ride-hailing excellence.

- Tracked and analyzed operational metrics, leading to a 15% increase in fleet utilization, outperforming the industry average improvement rate of 8–10% and boosting resource efficiency.
- Reduced executive decision-making time by 30% by designing and deploying 12+ real-time Power BI dashboards, doubling the average reporting efficiency improvement (normally 15–20%).
- Performed detailed pricing and demand analysis, enabling the development of competitive fare structures that balanced affordability and premium service.
- Analyzed customer behavior and preferences, driving improvements in user experience for the electric ride-hailing app and Care Ride service.
- Created data-driven visualizations and reports to communicate key insights to stakeholders, fostering informed decision-making and operational excellence.
- Developed dynamic predictive pricing models that will increase ride profitability by 8% Year over Year, which will outperform the mobility sector's average profitability gain of 5% and optimize revenue streams.

CAREER BREAK, RELOCATION PLANS TO THE UNITED KINGDOM/ STUDY BREAK (MSC). SEPTEMBER. 2023 – OCTOBER 2024

DATA ANALYST, NEW HORIZONS COMPUTER LEARNING CENTER, NIGERIA. FEBRUARY. 2021 – JUNE 2023

Analyzed complex data to provide actionable insights, supporting decision-making and optimizing training solutions.

- Increased student engagement by 18% by analyzing customer behavior data and building predictive models that optimized course offerings and improved learning experience personalization.
- Reduced data processing time by 35% by streamlining ETL workflows using Python, SQL, Azure, Databricks, and Snowflake, enabling faster decision-making and more efficient IT course delivery across multiple programs.
- Provided learning support and assistance to 50+ students daily per class, contributing to the success of a training center handling over 500+ active learners monthly, and helping to streamline student engagement processes.
- Developed interactive dashboards and visual reports to track key performance metrics, empowering stakeholders with real-time insights to assess the effectiveness of training programs and improve operational efficiency.
- Reduced training progress tracking errors by 17% by implementing rigorous data governance standards, boosting data consistency and analytics reliability across all reporting systems.
- Collaborated with cross-functional teams to analyze business goals and translate them into data-driven insights, supporting the design of targeted training programs that align with client needs and industry trends.

SELECTED PROJECTS

PROJECT TITLE: FORECASTING THE SPREAD OF INFLUENZA USING METEOROLOGICAL VARIABLES AND AIR QUALITY FACTORS OVER ENGLAND

TOOLS USED: PYTHON , TABLEAU. SEPTEMBER 2024. [Link to Project](#)

- Evaluating advanced machine learning models for predicting the spread of influenza.

PROJECT TITLE: EXPLORING PHONE PREFERENCES IN NIGERIA

TOOLS USED: MICROSOFT EXCEL, POWER BI. FEBRUARY 2024. [Link to Project](#)

- Conducted a comprehensive analysis of phone preferences in Nigeria, examining key factors such as age, price, and other relevant characteristics using Power BI and Excel to derive actionable insights.

PROJECT TITLE: NATURAL LANGUAGE PROCESSING USING TWITTER DATA

TOOLS USED: PYTHON. AUGUST 2024. [Link to Project](#)

- Analyzed Twitter data to uncover insights into user demographics, tweet sentiments, and usage dynamics across age groups, utilizing advanced natural language processing (NLP) and data visualization techniques.

LICENSES & CERTIFICATIONS

POWER BI DATA ANALYST ASSOCIATE

2025

- Microsoft Certified: Data Analyst Associate. [Link](#)

FORAGE, San Francisco, CA.

2023/2024

- British Airways – Data Science Job Simulation. [Link](#)
- TATA – Data Visualization: Empowering Businesses with Effective Insights. [Link](#)

DATA CAMP, New York, NY

2023

- Intermediate SQL. [Link](#)
- Understanding Data Visualization. [Link](#)

COURSERA.

2023

- Python for Data Science & AI. [Link](#)

EDUCATION

MIDDLESEX UNIVERSITY, London.

2024

- Masters of Science (MSc), Data Science
- **Relevant Modules:** Modelling, Regression and Machine Learning, Visual Data Analysis, Practical Big Data Handling, Cloud Distribution (Python, R and SQL).

FEDERAL UNIVERSITY OF TECHNOLOGY AKURE, Nigeria.

2021

- Bachelor of Science (B.Sc.), Computer Science
- **Relevant modules:** Software Development, Cloud Computing, Machine Learning, Data Science, Cyber Security, Web Development.
